Summary of Qualifications

- Proficient in HTML, CSS, JavaScript, and TypeScript for building responsive and interactive web applications
 - Experienced in developing dynamic user interfaces using the React, TailwindCSS , including component-based architecture and data binding
 - Strong understanding of modern front-end development practices, including responsive design and cross-browser compatibility
 - Skilled in writing clean, consistent, and well-formatted code using tools like Prettier
 - Knowledgeable in version control systems, particularly Git, including branching, merging, and collaboration workflows
 - Familiar with repository management and team collaboration using GitHub
 - Experience deploying and hosting web applications using Vercel, including continuous deployment workflows
-

Projects

GreenQuest - greenquest-ph.vercel.app

A web platform where users upload videos of eco-friendly actions (planting trees, cleaning beaches, recycling, etc.), an AI validates the action, awards points, and users can redeem those points for real rewards.

SDO Website - sdo-alangilan.vercel.app

Developed a responsive website for the Sustainable Development Office – Alangilan, enabling students to view sustainability programs, submit inquiries, and share ideas through email.

Career Highlights

- Mentored by a CTO during a startup project, gaining hands-on experience in real-world development, problem-solving, and industry-level workflows
 - Member of Student Coders for Innovative programming Techniques (SCRIPT) Web Development Branch - an exclusive organization focused on innovative programming techniques and advanced development practices (February 28, 2025).
 - Member of ASTRA Developers an exclusive University organization for the developers and innovators
-
