

DANIEL ALDREEN MANJARES

Front-End Developer

ABOUT ME

Front-End Developer with experience in building responsive and user-friendly websites using HTML, CSS, and JavaScript. Skilled in version control with Git/GitHub and deploying projects on Vercel. Passionate about creating clean, efficient code and delivering seamless web experiences.

EDUCATION

BATANGAS STATE UNIVERSITY- Alangilan Campus

2024-PRESENT

BS Computer Science

SKILLS

- Developed and maintained responsive, user-centered websites using HTML5, CSS3, and JavaScript (ES6+), ensuring cross-browser compatibility, accessibility compliance (WCAG), and optimized performance across a wide range of devices, from desktops to mobile phones.
- Built interactive features and dynamic functionality with JavaScript, including DOM manipulation, event handling, form validation, and data-driven updates, resulting in improved usability, smoother user experiences, and greater client satisfaction.
- Applied modern CSS methodologies such as Flexbox, CSS Grid, and media queries to design structured, clean, and scalable layouts, achieving mobile-first and responsive designs that adapt seamlessly to varying screen sizes and resolutions.
- Implemented version control practices with Git, creating and managing branches, commits, and merges to ensure clear and traceable development progress while preventing conflicts and maintaining high code quality in collaborative projects.
- Collaborated on team projects using GitHub, actively contributing through pull requests, code reviews, and issue tracking, which streamlined collaboration, improved code reliability, and fostered an efficient workflow in both solo and group settings.
- Deployed and hosted web projects on Vercel, setting up continuous deployment pipelines for automatic updates and ensuring reliable, fast-loading, and globally accessible websites with minimal downtime.
- Showcased portfolio projects on GitHub Pages and Vercel, presenting well-documented repositories and live demonstrations of work, highlighting front-end development expertise and commitment to best practices.
- Maintained clean, modular, and reusable codebases, with thorough documentation, consistent naming conventions, and adherence to industry standards, ensuring scalability, long-term maintainability, and ease of collaboration with future developers.
- Focused on optimizing performance and SEO, including reducing load times, applying responsive image techniques, and using semantic HTML to improve discoverability and enhance the overall user experience.
- Demonstrated adaptability and continuous learning by keeping up with evolving web technologies, coding standards, and deployment strategies, applying new techniques and tools to improve workflow efficiency and project quality.
