

Daniel Aldreen C. Manjares

Pinagbayanan, San Juan, Batangas

09633535638 | danielaldreenm@gmail.com | LinkedIn : [Daniel Aldreen Manjares](#)

Summary of Qualifications

- Proficient in HTML, CSS, JavaScript, and TypeScript for building responsive and interactive web applications
 - Experienced in developing dynamic user interfaces using the Angular framework, TailwindCSS , including component-based architecture and data binding
 - Strong understanding of modern front-end development practices, including responsive design and cross-browser compatibility
 - Skilled in writing clean, consistent, and well-formatted code using tools like Prettier
 - Knowledgeable in version control systems, particularly Git, including branching, merging, and collaboration workflows
 - Familiar with repository management and team collaboration using GitHub
 - Experience deploying and hosting web applications using Vercel, including continuous deployment workflows
-

Projects

San Juan Senior High School Website - [sjshs.vercel.app](#)

A prototype web-based school platform designed to explore how students can access academic resources, announcements, and essential information in a centralized system.

MyPortfolio - [danielmanjares.vercel.app](#)

My personal portfolio is a website built using Angular to showcase my web development skills and projects. It highlights my experience in creating responsive and user-friendly web applications.

Stanza - [stanza-ph.vercel.app](#)

An ongoing web-based dorm listing app for Batangas City that helps students find and explore dorms, bed spaces, and apartments in one centralized platform.

Career Highlights

- Mentored by a CTO during a startup project, gaining hands-on experience in real-world development, problem-solving, and industry-level workflows
 - Member of Student Coders for Innovative programming Techniques (SCRIPT) Web Development Branch - an exclusive organization focused on innovative programming techniques and advanced development practices (February 28, 2025).
-
